January 4, 2022

Dear Roseville Community Schools Parents/Guardians:

Last night, the Roseville Community Schools' Board of Education made a resolution to temporarily require masks through the end of this semester (Friday, January 28, 2022). This decision was made based on the number of cases in the county, our two largest schools (Roseville High School and Roseville Middle School) on the outbreak list, and many staff and students reporting positive cases of COVID in our district. This mitigation strategy has worked in individual schools in the past. As always, we will continue to monitor case counts and the Board will revisit this resolution at the end of the semester.

To help reduce the spread of COVID-19 please assess your child's health each morning. If they have any of the symptoms of COVID including cough, shortness of breath, difficulty breathing, loss of taste or smell, please keep them home from school and all extra-curricular activities. Students are not allowed to attend school or any school function, if they have two or more of these symptoms: fever of 100.4 or higher, chills, muscle aches, headache, sore throat, upset stomach or vomiting, diarrhea, fatigue, congestion or runny nose.

As a reminder, students who are within 3' of a positive case for a cumulative 15 minutes in a 24-hour period are considered a close contact and are required to be quarantined for 10 days. Fully vaccinated students are not subject to close-contact quarantine. The definition of being fully vaccinated is two weeks after the individual has received their final vaccination shot.

As I mentioned in my letter yesterday, maintaining good hygiene practices at home as well as at school, can also help mitigate the spread of the virus. Wearing masks out in public, using hand sanitizer and washing hands and maintaining a healthy immune system can all help in reducing the number of cases.

Thank you for your cooperation.

Sincerely,

Mark Blaszkowski
Superintendent
